

Fig. S2. Unmarked periodic acid-Schiff-stained images for Fig. 3B. (Scale bar, 25 μm .) P, postnatal day.

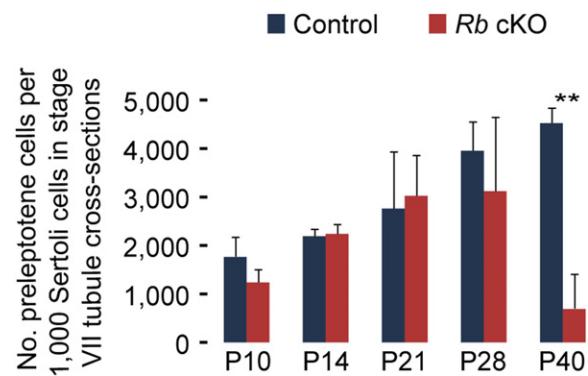

Fig. S3. Number of preleptotene spermatocytes per 1,000 Sertoli cells in stage VII tubule cross-sections of control and retinoblastoma gene *Rb* conditional knockout (*Rb*^{fl/fl}, *Mvh*^{Cre-mOrange⁺}) testes (mean \pm SD, $n \geq 3$ for all points, except $n = 2$ for P40 controls). ** $P < 0.01$ (two-tailed Student *t* test).
