

Repping et al. **Supplementary Figure 5** Mutational event that can generate *AZFc* architecture c6. **a**, The reference *AZFc* architecture. The blue bow indicates amplicons b2 and b4, which are the amplicons involved in the ectopic homologous recombination event that can generate architecture c6. **b**, Representation of the duplication event. **c**, Architecture c6. Main text Figure 4 shows FISH results for the reference *AZFc* architecture and architecture c6.

a *AZFc* reference architecture

b b2/b4 duplication

c *AZFc* architecture c6
