

Rozen et al., Table S2. Pseudogenes surveyed for DNA sequence variation.

Pseudogene	Numbers of nucleotide sites surveyed
<i>ARSDP</i>	2,472
<i>APXLP</i>	2,133
<i>KALP</i>	3,777
<i>STSP</i>	2,160
<i>BCORP</i>	4,709
Total	15,251

NOTE: Table S3 provides details of STSs (primer pairs) used to amplify pseudoexons and surrounding sequence.
